

Construction Project Engineer – Brookings SD

Job Type: Full Time

Reports To: Project Manager

Are you a Construction Management graduate looking for a unique Design-Build team to work with? Do you have a high energy, positive, enthusiastic attitude and believe in servant leadership? Are you detail orientated, self-motivated and committed to the process of life-long learning?

If you answered yes to all of these, we'd like to talk to you. Mills Construction is a big family made up of 12 smaller teams. Every day is different. Every project is an adventure. Every client/owner is a long-term partner. We love solving problems together; trouble-shooting, thinking, dreaming, planning, and helping clients and owners turn their dreams into reality. Our architectural, project management and construction teams consistently work together.

Skills/Requirements

- Basic understanding of Microsoft Office and Project, Auto CAD, Foundation Project Control and Timberline Estimating
- Basic understanding of project scheduling, specifically understanding critical path activities
- Project knowledge – knows the project scope, approach and details as well as the Project Superintendent on site
- Is a naturally gifted communicator
- Extremely organized, detail oriented and analytical
- Gets stuff DONE! Multi-tasks so well that plate spinners look on with awe
- Independent, but desires to be part of something larger than themselves
- Sets a goal and takes action to conquer it!
- Professional and committed to the success and growth of Mills Construction
- Developing leadership skills
- Developing confidence in making sound decisions in a timely manner
- Is always learning, growing and being stretched

Education/Experience

- Bachelor's degree in Construction Management
- Minimum 2 summers of field labor experience and a Construction Management internship.
